Our Services

Cloud Solutions

With our cloud computing solutions, we will allow your company to avoid or minimize up-front IT infrastructure costs, and save on both capital and operational expenditure.

Cyber Security

We will help your business secure the most valuable data. Our solutions are customized to meet fast growing data needs and be elastic and open to allow for expansion.

Market Research

When you want to grow your technology department, either in sales, have market research, have informed decisions on the technology to use, we will be there to help.

Our Services

Add you Value

UI & UX Design

We will clearly define your brand goals to your customers

Data Recovery

All is not lost during system failures. We specialise in this.

Software Development

We design software/websites that convey exactly what your business does.

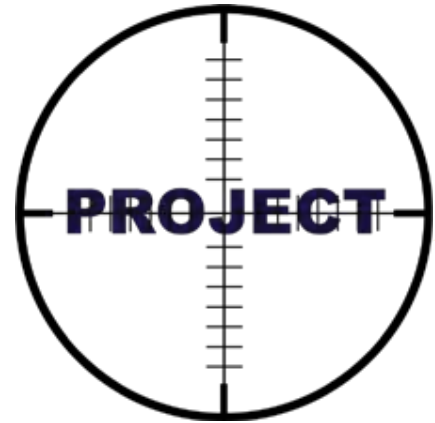

**We do what we love. Our success and value creation results stand to prove this.
We value quality results.**

Project Case Study

01

Project Overview

There was the need to Global Open Versity to have a custom solution to provide affordable online courses for students. The system had to support video, text and image content.

02

Challenge

Come up with a fast, responsive system that could be accessed on at least 85% of devices with ease of use, able to let students resume courses and interact with instructors.

03

Solution

Blancorp designed, developed and launched the system that was immediately a magnet for online learners, with more than 5,000 students graduated so far.
